

### **Hosted Server and Infrastructure** **Outsource your Infrastructure**

Take your server to the cloud and reclaim your office space while eliminating management and hardware expenses.

Everybody has heard of 'the cloud,' but many businesses are unaware of the many benefits that cloud hosting can offer small and medium-sized businesses.

By hosting your server and other mission-critical equipment in a reliable, properly managed data center, your business will have less hardware to maintain. This means more space, reduced electricity consumption, and less overhead. Best of all, hosted infrastructure can be managed by our IT experts to ensure constant reliability, stability, and uptime. We ensure that your data is always redundantly backed up, and antivirus and security protection is handled in-house.

### **Revolutionize your IT**

Stop purchasing expensive hardware only to pay to administer, maintain, and manage it.

Our data center provides secure, reliable access to your servers. Forget about security patches, software updates, and hardware management. The Corporate Technology Group cloud environment is very scalable, giving you the resources your business requires.

## Business Computing

Easily access files and applications from anywhere—flexible, mobile, and always on.

Beyond reducing operating costs, hosted server and IT infrastructure empowers your business to access files and applications from anywhere. This is perfect for businesses with multiple offices or employees who need to work from home or on the road.

Access applications like Microsoft Office, Outlook/Exchange, and the software applications you use to run your business such as your accounting suite and CRM tools. In other words, it's your IT environment hosted in our data center. You won't lose functionality, but your business would benefit from drastically reduced overhead and increased cost-savings.

## Infrastructure in the Cloud

Take your whole IT to the cloud

Don't take just your server to the cloud. Corporate Technology Group offers a full range of hosted infrastructure solutions including data storage and desktop virtualization.

With a completely managed hosted IT infrastructure, empower your team with the tools they need and still protect your bottom line. You will no longer have to worry about hardware and software upgrades again. Set up a consultation and see how much you can save with Corporate Technology Group Hosted IT Solutions today .
